[SOAP] Progress Note

Subjective

"Tremor better, sleep still rough. Want to leave AMA but my brother won't take me back." Reports anxiety improving with librium. Denies SI/HI.

Objective

BP 142/88, HR 92. CIWA-Ar = 8 (nausea 1, tremor 2, sweats 1, anxiety 2, agitation 1, headache 1) — down from 12 at intake. MSE: alert, cooperative, affect constricted, no acute distress. UDS pending.

Assessment

Alcohol withdrawal, moderate, improving on chlordiazepoxide taper. Benzodiazepine withdrawal anticipated but not yet manifest. MDD and GAD untreated; defer pharmacologic initiation until withdrawal resolves.

Plan

Continue chlordiazepoxide taper, add gabapentin 300mg TID for benzo withdrawal prophylaxis. Continue daily CIWA monitoring. MOUD evaluation deferred — no opioid use. Re-evaluate level of care in 5 days.
