[DSAP] Progress Note

Data

UDS negative across panel. CIWA-Ar = 2 (no withdrawal x 48h). BP 128/82 on lisinopril 10mg restarted day 4. LFTs trending down (AST 92, ALT 71). Attended 4/4 daily groups this week.

Subjective

"I think I'm ready to step down to PHP. My brother is still using though, so I'm worried about going home." Denies SI/HI today.

Assessment

Ready clinically for step-down per Dim 1 (resolved withdrawal) and Dim 2 (improving). Dim 3 (PHQ-9 not repeated this admission — see note), Dim 5 remains the limiting factor (unsafe home environment). Recommending 3.7 → 2.5 (Partial Hospitalization with IOP step) rather than full community discharge.

Plan

Coordinate transfer to PHP starting 2026-05-15. Social-work to secure sober-housing referral. Re-administer C-SSRS prior to transfer per NPSG.15.01.01. Continue gabapentin; psychiatry follow-up scheduled day 14 for MDD/GAD pharmacologic eval.
